**FTDATA Celebrates 10 Years of Outstanding Service**

September 4, 2008, Laurel, MD – FTDATA Inc., a leading Information Technology and Telecommunications solutions and services provider with superb project management expertise, today announced the celebration of 10 years of business success and customer service excellence.

FTDATA was founded in 1998 by a group of former Verizon engineers who wanted to combine the technical excellence found in a Fortune 50 corporation with the personal touch and level of customer care found in a small company. “Our motto and our practice has always been, ‘Technical Excellence, Tangible Results,’” said Founder and CEO Frank Tyner. “Our engineers combine outstanding technical excellence with customer service skills and client diplomacy that are among the best in the business. We have a dedicated group of long-term loyal customers, many who have been with us since the beginning of our company.”

Frank Tyner, Bob Berglund, Eric Fritz, Jim Gonzales, and Steve Jones are the founders of FTDATA and have been instrumental in sustaining the company’s year-over-year revenue growth. FTDATA started with a small commercial sector practice and has expanded their customer base to include numerous associations, financial institutions, and health care providers. In 2005, FTDATA started a Federal practice providing infrastructure planning, implementation and design services for the Department of Veterans Affairs, Department of Agriculture, the Social Security Administration and other government agencies. In 2006, FTDATA was selected as a Prime Contractor on the Veterans Technology for Services (VETS) Government Wide Acquisition Contract (GWAC). FTDATA is one of only 44 service-disabled, veteran-owned companies awarded prime contracts on the VETS GWAC by the U.S. General Services Administration (GSA).
